

Critical-Chains Financial Sector Infrastructure Cyber-Physical Security Protection

Final Project Workshop

Friday 30th September 2022 - 10:00- 13:00 CET

This is the 8th workshop in the series (co) organised by the Critical-Chains Consortium and as our Final Project Workshop, it is packed with demonstrations of our ground-breaking innovations to support the financial sector security and integrity. Our Sectoral Gateway Partners, POSTIET for the Financial Sector and INDRA for Mobility Services and Transportation will participate in the showcasing of the Critical-Chains Solutions as validated in our priority Pilots.

Our Demonstrations will include user scenarios in Digital Identity, Authentication and Authorisation as well as Blockchains Smart Contract enabled Merchant Scoring, Insurance Claims Anomaly Detection and Highway Toll Operations support services - all underpinned by the Critical-Chains Accountability -by-Design approach.

The workshop will take place as a virtual event on Friday 30th September (10:00-13:00 CET).

Participation in this workshop is free and open to all; we expect it to be of particular interest to the ***financial sector network security and transactions monitoring managers*** as well as the ***European Commission regulatory policy and other standardisation stakeholders*** - all are most welcome to attend.

The pre-registration and participation in this workshop on 30th of September is arranged through the Critical-Chains Dissemination Manger, please contact silvia.denegri@rina.org
